

Guard Rail & Barrier Post

OSHA Compliant Fall Protection Device

Advantages

Excavations and trenches frequently remain open for extended periods of time. Efficiency's new **Barrier Posts & Guard Rail** are an easy, OSHA compliant fall protection device. Guard rails come in 4, 6 and 10 feet lengths, and the barrier posts' adjustable shoes fit all Slide Rail System panels, and 3-8 inch steel trench shield sidewalls.

Efficiency Production also recently developed a special adaptor plate for the barrier post that allows the guard rail to fit on **Build-A-Box™** panels; providing easy, safe fall protection for America's most popular modular aluminum trench shielding system.
